Press Release

Final Benghazi Report – Audiobook to be released on 9/11/16

An audio version of the final report has been created for those who don't have the time to read it. This is the first time a full cast of professional voice actors perform a congressional report on par with Watergate, which results in the deaths of four Americans and affects two consecutive presidential elections.

Mountain Center, California, August 29, 2016:

Members of the Select Committee on Benghazi Majority released their final report on July 8, 2016. The report is based on the sworn testimony of more than three dozen witnesses involved in the events in Benghazi before, during and after the attack on September 11, 2012 that ultimately resulted in the deaths of four Americans. Several questions are answered how our government failed to protect their lives, and how an alleged cover-up on par with Watergate determines the fate of two consecutive U.S. Presidential elections.

The attacks resulted in the deaths of Ambassador Christopher Stevens, information specialist Shawn Smith, and Special Forces soldiers Tyrone Woods and Glen Doherty. Testimonies show that more than 600 requests for additional security prior to the attack were made. Testimonies show that several pleas for help during the 13 hours of both attacks were made. Testimonies show a YouTube video that was considered defamatory to the prophet Mohammed was given as the reason for the attack.

The report also showed that security requests were ignored and never granted; help never came nor was it ever even headed towards Benghazi to assist OR evacuate the Americans, and the story of the YouTube video being the cause of the attack proved to be false.

The report highlights the firsthand accounts and testimonies of Secretary of State Hillary Clinton, Secretary of Defense Leon Panetta, high ranking members of the military all the way down to the soldiers and staff on the ground who fought to save themselves on the night of the attack.

The report attempts to determine responsibility for the errors and implement future preventative measures to ensure these mistakes never happen again. Both Republicans and Democrats accuse each other of partisan politics, and the audio book gives much greater access to the public who don't have the time to read it. The audio book will inform and allow the listener to decide for themselves "what really happened" during this historic event.
